This line chart displays the monthly average number of tweets for the #MeToo and #TimesUp hashtags throughout 2017. The y-axis represents the number of tweets in millions (M), ranging from 7M to 9M. The x-axis lists the months from January to December. Two lines are plotted: a teal line for #MeToo and a green line for #TimesUp. Both hashtags show a significant dip in January, followed by a rise in February. #MeToo maintains a higher average volume than #TimesUp for most of the year, with a notable peak in August. #TimesUp shows a sharp increase in September, peaking in October before declining.

Month	#MeToo (M)	#TimesUp (M)
January	8.4	8.5
February	7.9	7.5
March	8.4	8.4
April	8.1	8.3
May	8.2	8.2
June	8.5	8.2
July	8.3	8.6

Insights & Recommendations

Insights

- Only 44.6% of deliveries arrived on time, affecting customer satisfaction.
- Fuel costs consumed 32% of total revenue over 3 years.
- Revenue remained almost flat from 2022 to 2024 despite stable load volume.
- Preventable safety incidents caused over \$1.8M in losses.
- Contract customers generated the highest revenue compared to other customer types.
- Some routes earned significantly higher revenue per mile than others.
- Top-performing drivers generated 32% more revenue than low-performing drivers.
- Equipment damage was the most expensive incident category in the fleet.

Recommendations

- Improve dispatch and dock scheduling to increase on-time deliveries.
- Reduce driver idle time to lower fuel expenses.
- Renegotiate low-margin customer contracts and freight rates.
- Focus more capacity on high-profit routes.
- Introduce targeted driver coaching and performance monitoring.
- Increase preventive maintenance to reduce costly repairs and downtime.
- Launch stricter safety and defensive driving programs.
- Implement mandatory vehicle and equipment inspection checklists before trips.
